## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted based on the following groups.

Group I, claim(s) 1-42, 85, 87, 89, 91, 95, 99, 101, 103 drawn to switch device(s) without variable optical attenuator(s).

Group II claim(s) 43-84, 86, 88, 90, 92-94, 96-98, 100, 102, 104 drawn to switch device(s) with variable optical attenuator(s).

Currently claim 1 is generic to all of the claims.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of variable optical attenuator(s) is not in the group I claims but is in the group II claims.

Furthermore, in accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted based on the following subgroups.

A. Those claims that contain birefringent index adjustment means.

B. Those claims that do not contain birefringent index adjustment means.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of birefringent index adjustment means is not in the group B claims but is in the group A claims.

Even further, in accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted based on the following subgroups.

C. Those claims that contain adiabatic grooves.

D. Those claims that do not contain adiabatic grooves.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of adiabatic grooves is not in the group D claims but is in the group C claims.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
